548—1866. Five Cents. Washington obverse. Rev. small "5" in wreath Copper-nickel. R8 ---------- 22.50

NOTE—The word "nickel" is not used unless the metal is actually nickel. In the work on pattern coins it was used whenever it occurred in catalogues, but the term is wrong, as only a very few coins are actually composed of nickel. The usual metal is a composition of copper and nickel, which is used for striking the present so-called "nickel," which, differing from real nickel, is not magnetic.

567—1866. Five Cents. Copper-nickel. Thick planchet. Rev. small "5" in wreath. R10 ---------- 22.50

568—1866. Five Cents. Same as foregoing. Bronze. R10 ---------- 15.00
